WITNESS STATEMENT OF JON SMITH

①

I, Jon Smith, will say as follows:

1. I am Chief Inspector Jon Smith of Merseyside Police currently stationed at St Helens Police Station, College Street, WA10 1TG. I have been a serving police officer for over 17 years.
2. My role as Chief Inspector for St Helens Local Policing gives me responsibility for the delivery of operational policing across the Borough of St Helens. I am responsible for delivering policing in line with community needs, managing threat and risk, and delivering operational policing in managing any identified risks. In turn, this makes me responsible for operational policing of the St Helens Night-Time Economy ('NTE').
3. I am familiar with the St Helens area. I was posted to St Helens in January 2020 as Neighbourhood Inspector and have worked within St Helens since that time. As such, I have had some responsibility for delivery of operational policing of the N.T.E. in St Helens since January 2020.
4. I have experience in producing evidence in support of representations made by Merseyside Police regarding premises licence applications and variation applications, based on my local knowledge of the St Helens area.
5. I am aware that the premises known as "Maloneys", located on Ormskirk Street, St Helens, have submitted an application for Temporary Event Notices which will entail an extension of licensing hours from 03:00hrs to 05:00hrs. It is my belief that to grant such a T.E.N. would undermine the licensing objective of the 'prevention of crime & disorder' and would add further to the cumulative impact in the area.
6. Incidents of anti-social behaviour, crime and disorder are particularly prevalent within the N.T.E. and especially on Friday and Saturday night, as there are a large number of bars, pubs and nightclubs within a small area.

7. St Helens is a centralised town in terms of its N.T.E., with the majority of the bars, pubs and restaurants located within the Town Centre Ward. As such, the streets that contain the largest number of licensed premises tend to attract the most visitors and in turn suffer most from anti-social behaviour, crime and disorder.
8. Having recently reviewed crime data for St Helens, and the times and days when violent crime is at its most prevalent, it has shown quite clearly that it is during these times, in the Town Centre Ward, when there is a greater risk to residents and an increased likelihood of violence.
9. The D111 policing beat, which covers Ormskirk street and Maloneys, suffers from a significant number of incidents of anti-social behaviour, crime and disorder.
10. From my experience, these incidents include things such as public order offences, assaults, assaults with weapons and robberies, with the vast majority of these having had alcohol as a contributing factor. For the twelve months prior to the completion of this statement, there were 608 violent crimes in the D111 beat. The closest policing beat to this in the Borough of St Helens had experienced 162 less crimes, a significant difference, and that was D231 in Parr with 446. I have produced a screenshot from Merseyside Police Delphi system, which I exhibit as JS/01, which shows this data.
11. When considering that D111 is the beat with the most violent crime in St Helens, it is then even more significant when considering this T.E.N., that within this beat, Ormskirk Street, carry's it's own level of crime, having had 42 instances of violent crime over the twelve months prior to completing this statement. 47.62%, were violence with injury. Furthermore, 4 instances, took place during the hours of 03:00-05:00hrs. I have produced a further screenshot from Delphi to display this data, which I exhibit as JS/02.

12. Based upon my experiences of the St Helens N.T.E., it is evident that as bars such as Maloneys, extend their hours and serve alcohol longer, people in these premises become more intoxicated, as the night progresses. To extend hours creates a greater likelihood of increased intoxication levels, and significantly increases the likelihood of crime and anti-social behaviour. The hours of 03:00-05:00hrs can already be seen to be a peak period in violent offending, and so I would deem an increase in licensable activity to cover this time as a step that would be damaging to users of the N.T.E. and one that would put patrons and residents at greater risk.
13. There is a regular police presence in the D1 beat on a Friday and Saturday night due to concerns regarding potential anti-social behaviour, crime and disorder. These resources are on duty until 04:00hrs as part of their core shift patterns. From 04:00hrs onwards, there are limited resources covering the Town Centre and what remains on duty is responsible for covering the entirety of the St Helens area. These shift patterns have been created having taken into account peaks in calls for service demands and operational requirements across the Merseyside area. They are a core shift pattern and so it is clear from a policing perspective that as well as the risks to the public of increased violence, such extended operating hours also place a strain upon Police resources.
14. The resources referred to at paragraph 13 above are deployed on their shift pattern in line with overall force resourcing and demand requirements. Variations of shifts mean that cumulative resource levels drop at core times and it can adversely impact the force's ability to respond to contingencies that require the rapid movement of staff across Merseyside. These resources that are on duty until 04:00hrs maintain a presence on Ormskirk Street and the surrounding area as users of the N.T.E. slowly dissipate and gather around taxi ranks, and takeaways, and the surrounding areas, some of which hold a licence for late-night refreshment until 04:00hrs.
15. To my knowledge, none of the premises located on Ormskirk Street currently hold a permanent alcohol licence beyond 03:00hrs.

16. It has been my understanding that some premises within the D1 beat have utilised T.E.N.s previously to extend their hours beyond 03:00hrs for special events. From my experience, these premises with T.E.N.s tend to act as a 'magnet' to attract customers after 03:00hrs due to there being no alternative premises open. Inevitably, these customers are more intoxicated than they were earlier in the evening and tend to be more 'rowdy', which often leads to more incidents of anti-social behaviour and crimes being committed. Due to a change in force structure to a centralised licensing model caused by limited resources, a practice of authorising such T.E.N.s without wider considerations took place. Having recently commenced my role as Chief Inspector and reviewed both the data, and practices that we have in place, I am now intent upon placing a greater emphasis upon reviewing such T.E.N. applications. I have a responsibility to act in the best interests of the St Helens residents and ensure safe use of the N.T.E. The data presents a clear and emphatic crime pattern and I believe that to grant such T.E.N.s places residents at greater risk of becoming a victim to violent crime.
17. Further to the above responsibilities that come with my role, and the data discussed, it is also of utmost importance to highlight the fact that the D1 beat area, sits prominently in a defined Serious Violence Hot Spot. Such Hot Spot locations are identified through analysis of serious violence data, taking into account offences committed and likelihood of future harm. Dedicated analysts, funded by Home Office, have identified 12 hot spot locations across Merseyside and this is one of them. Such locations are provided Home Office funding to implement problem solving responses and part of the effective response to tackling high levels of serious violence in this locality is the effective management of risk presented by the N.T.E. In order to manage this, we have previously funded improved lighting and CCTV coverage, along with the purchase of knife wands for Security Industry Authority (S.I.A.) trained door staff. This being the case, it is my duty to take all available opportunities to reduce risk and tackle serious violence.

⑤

18. As can be seen from Exhibit JS/03, levels of serious violence for St Helens are at their highest in D111 beat, with there having been 26 instances in the twelve months prior to this statement. D112, which is also in the Town Centre, is second and had 19. Ormskirk Street is within the area with the highest level of serious violence. All of which took place between the hours of 03:00-06:00hrs
19. It is my assertion that the extension of these licensing hours will be counter-productive to the work we have undertaken, and continue to do, in order to make this area a safer place for patrons. Such increased licensing hours, in my opinion, contribute to increased risks to the wider community and a greater likelihood of alcohol or drug related violence.
20. Due to the prevalence of anti-social behaviour, crime and disorder occurring in the Town Centre ward generally, Merseyside Police, alongside Community Safety, submitted evidence in support of a Cumulative Impact Assessment to St Helens Council. I understand the Cumulative Impact Assessment has been exhibited elsewhere.
21. The evidence submitted to St Helens Council highlighted a number of specific streets where anti-social behaviour, crime and disorder were proportionally higher than elsewhere in the borough. Ormskirk Street, the location of Maloneys, was highlighted as such a street.
22. I understand the Cumulative Impact Assessment was subsequently approved by St Helens Council, focused on four specific streets including Ormskirk Street. This reinforces my belief that there is sufficient evidence to demonstrate significant issues faced in this area.

I believe that the facts stated in this witness statement are true.
